REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art does not disclose an agent for removing a halogen series in the form of granule, and the granule comprises (1) a solid base, which is sodium hydrogen carbonate and/or potassium hydrogen carbonate; (2) a carbonaceous material and (3) porous material, which is silica gel and/or zeolite having an average pore radius of from 0.1 to 50 nm and a pore volume of from 0.05 to 4 cm³/g. In Hayasaka '082, an alkaline earth metal oxide, hydroxide or carbonate is used, not sodium or potassium hydrogen carbonate and the zeolite is used as a separate layer, not as part of the granule. In Osborne '276, there is disclosure or suggestion to include silica gel or zeolite into the adsorbent of Osborne '276.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
